About Event:

The aim of YRM is to bring in Research ideas and prospects from an industrial point of view and pitch it in front of the budding young Researchers' from various parts of the country. YRM would be a platform wherein students, faculty and full time Researchers could be involved in brainstorming and be mentored by eminent Researchers and Industrial Experts providing a practical point of view for their Research Problems.

The workshop is primarily aimed at Graduate, Post-Graduate students, and young professionals intending or pursuing Ph.D program in these areas. The main purpose of this workshop is to provide a platform for young researchers, both experimentalists and theorists, to interact and form collaborations across different domains of Power and Energy Systems.

Topics Covered

- Recent Research era & Opportunity in Energy & Power systems.
- Renewable Sources for Sustainable Development.
- R & D Funding Opportunities.
- Intellectual Property Rights (IPR)
- Mentoring Sessions / Panel Discussion on Research Progress
