

IEEE IMS NSW Chapter

IEEE IMS NSW Chapter would like to invite you to the opening of the Chapter on 20th July with the following details.

Details of the schedule for the evening:

Date: July 20, 2017

Venue: Building E6B 149, Macquarie University, North Ryde

Time: 6.0pm for 6:30pm start

6:30pm to 7:00pm : Executive committee, IEEE IMS Briefing

7:00pm : DL talk by Prof. Andrew Taberner, IEEE IMS Distinguished Lecturer

Title of the talk: Measurement and Instrumentation at the Tissue: Machine interface

Abstract: Biomedical Instrumentation is designed to provide clinicians, scientists and consumers with useful information about the performance and properties of the human body in health and disease. In many applications in medicine and biology, scientific instruments and medical devices operate at the interface between the “soft” world of living organisms and biological substances and the “hard” world of measurement and actuation systems. The development of such instruments and devices requires the designer to draw from and master a wide range of techniques and tools that span biology, chemistry, materials science, optics, mechanics, mathematics, electronics, and computing.....**etc.....**
