Editorial:

This is the eighth newsletter I've edited.

This one is being edited with a newly downloaded copy of the very latest version of Libre Office – 5.2.7.2 - which still doesn't necessarily mean that I'll be able to process .docx submissions – if they come in as .docx, they will get translated to .doc. purely for self-protection. Some of the odder formatting quirks of Word can take quite a while to track down and undo.

The run-up to the IEEE Sections Congress at the International Convention Centre of Sydney in August is still under way, and ANZSCON 2017 has accepted a bunch of registrations – I'm treasurer for it purely because I've got access to the relevant bank account in my capacity as ex-treasurer to the section (dignified as assistant treasurer – since I'm retired I can sometimes do things sooner than the real treasurer, who isn't).

Bill Sloman

Chairman's Message

I am pleased to announce that all applications which requested financial support from the New South Wales Section to register for 2017 IEEE Section Congress through a scheme announced in an eNotice have been approved.

A similar scheme to support IEEE volunteers to attend 2017 ANZSCON held in Sydney in August, just before the Section Congress, has been announced.

Details of ANZSCON can be found at <http://sites.ieee.org/anzscon-2017/>.

Mr Ian Boyd has returned to IEEE NSW Section Committee as the chair of the Computer Chapter. Ian was very active with section activities when he was in the committee last time. Welcome back, Ian!

Karu Esselle, FIEEE
NSW Section Chair

Teacher-Student Support Program

The NSW Section has in recent years been very active in promoting the TSSP lesson plans provided by the IEEE Education Activity Board to STEM school teachers. This had been done by making contact with the STEM teachers through their state/national Teacher Associations at conferences and other major gatherings. We have introduced over 1000 teachers to the TSSP education resources the IEEE makes freely available to them, and have had about 200 participate in workshops where they were able to use the lesson plan resources as if in a classroom with students.

One conference in 2016 was in Canberra, and the Section was able to work in conjunction with the ACT Section in making our usual presentation. It is hoped the ACT section will continue with the presentations in future years.

We also been to a couple of secondary teacher get-togethers in NSW in 2017 and expect to keep on doing this. There is a move to get more of the US IEEE lesson plans aligned with the Australian secondary curriculum. This does cost money (though not a lot) but it does make the lesson plans more attractive to Australian secondary teachers – not that free lessons plans aren't attractive even if they haven't been aligned.

We are supposed to be manning a desk more or less continuously for a week at the Australian Museum at the same time as the Sections Congress is going on in August. We are being stretched to man all these demands, and are seeking more members to assist in this important initiative. The more volunteers we get to help out the happier we will be.

Please contact Graeme at the e-mail address below

Graeme Gwilliam et al

**IEEE 2017 International Symposium on Technology and Society (ISTAS 2017):
*From Good Ideas to Practical Solutions***

10 – 11 August, 2017 in Sydney, Australia

<http://ieeessit.org/istas2017/>

The SSIT Board of Governors is pleased to announce that the next IEEE International Symposium on Technology and Society (ISTAS 2017) will be held in Sydney, New South Wales, Australia from 10 – 11 August, 2017. The date and location of ISTAS 2017 has been chosen to coincide with the annual IEEE Panel of Conference Organizers (IEEE POCO) event, which will be held Sydney from 7 – 9 August, and the biennial IEEE Sections Congress, which will also be held in Sydney from 11-13 August, 2017.

The theme for ISTAS 2017 – *From Good Ideas to Practical Solutions* – has been chosen to focus on how we can identify a good technological idea and transition it into a practical solution that delivers real benefits to society. It will bring together scientists, engineers, technologists and scholars from multiple disciplines to hold a dialogue on many technological and societal issues, and collaborate on ideas to develop and utilize innovative solutions to address them.

The main conference will be supported by several workshops and special sessions, including the 10th Workshop on Social Implications of National Security, hosted by the Dr Katina Michael (University of Wollongong), and a Doctoral Mentoring Workshop for PhD Students, hosted by the University of New South Wales.

The website offers a lot more detail – much more than would fit in Circuit.

If anyone is interested in joining us, or keeping up with SSIT events, please contact me at lyria@unsw.edu.au.

Lyria Bennett Moses, Chair, SSIT Australia

Nomination Form for one position in the IEEE NSW SECTION

Section Executive Officers to be elected by electronic vote (by the Members);

Elected positions by Chapters and Affinity Groups (Chair/Vice Chair/Secretary/Treasurer);

Non-elected positions (appointed Officers).

Closing date Wednesday 31 August 2017 midnight

NOTE: Chapter and Affinity Group Committee Executive positions are elected by the respective Chapter Members.

Nomination Form Instructions:

Before completing the form, review the following guidelines for nominating a volunteer Candidate:

(a) Nominators must contact their nominee before submitting the form and confirm their acceptance of the time & other commitments required for the position.

(b) Nominees must have had at least 2 years on the Committee to nominate for the key positions of Chair, Vice Chair, Treasurer and Secretary.

(c) Nominees for Section Executive positions should be Senior Member or higher

(d) Self nominations require the submission of additional information e.g. CV or SMIEEE referee

(e) If you are nominating for more than one position, separate forms should be submitted.

(f) Please note the closing date, completed forms to be emailed to:

Greg Andrews

Email: greg@computer.org

or snail mailed to PO Box 114, French's Forest NSW 1640

New South Wales, Australia

UNSW ELSOC and TWEET Industry Night 5 April 2017

Industry Night 2017 was held in the Leighton Scientia Hall, John Niland Building and was attended by well over 300 Graduate and Postgraduate Students. With around thirty participating organisations this year's event was bigger than ever and built on the success of previous years. I am pleased to say that IEEE has been involved with Industry Night since the first event in 2014.

The event was opened by Prof Julian Epps with welcoming remarks also by Thomas Welsh of ELSOC (Electrical Engineering and Telecommunications Society UNSW).

Participating organisations included Schneider, Silanna, Nothrop, RCR, ADF, Dolby, ERICSSON, Finisar, Imagination, Cochlear, OSI, The IET and IEEE NSW Section amongst others. For a full list of participating organisations see

<https://www.engineering.unsw.edu.au/electrical-engineering/all-events/annual-eet-industry-night>

Industry Night is intended to give organisations the opportunity to discuss with students career paths, internships, skill requirements, work opportunities and requirements as well as to answer employment related questions. Students can interact with potential employers and gain valuable insights into employment prospects as well as career advice. Engineering students are required to complete a minimum of ninety days of industry experience in order to obtain their Degree. Anyone interested in employing students please contact Ray Brown or myself.

The IEEE NSW Section was represented by Georgios Konstantinou, Bill Sloman, Colin Elston, Ray Brown and Tony Zaglas. Prof Jinhong Yuan FIEEE and Dr Toan Phung visited the IEEE NSW desk. If your organisation is interested in participating in future events or is looking to employ students you can contact Ray Brown or me.

Thomas Welsh and Prof Julian Epps

Dr Georgios Konstantinou, Tony Zaglas, Colin

Dr Georgios Konstantinou. Dr Bill Sloman and Colin Elston

After the exhibition interested participants(organisations and students) attended a BBQ on the Globe Lawn.

I would like to congratulate all the UNSW ELSOC and TWEET volunteers for an excellent event and thank all the participating organisations. Many thanks to Prof Julian Epps, Dr Tim Moors and UNSW for inviting IEEE NSW Section to participate in the event. Also a special thanks to Thomas Welsh of ELSOC and Maddison Dunster of TWEET for their hard work and their assistance.

Tony Zaglas
IEEE NSW Section Awards and Recognition Chair

A new IEEE chapter in NSW

The IEEE Instrumentation and Measurement Society (IMS) New South Wales Chapter was approved on 21st June 2017.

The New South Wales branch has 25 IEEE IMS members.

Prof. Subhas Mukhopadhyay (Subhas.Mukhopadhyay@mq.edu.au) of Macquarie University took the initiative in setting up the chapter. He contacted the IEEE IMS NSW members and persuaded enough of them to sign the petition to allow the IEEE IMS NSW chapter to go ahead on 9th May 2017.

The chapter has now been officially been approved. The opening ceremony of the chapter is planned to be held on July 20, 2017 at Macquarie University. The executive committee members will be chosen then and there will also be a talk by a Distinguished Lecture from the IEEE IMS.

Prof. Subhas Mukhopadhyay is also organising the 11th International Conference on Sensing Technology which is going to be held at Macquarie in November – see below for the flyer, carried over from the March Circuit.

For more information please contact Prof. Subhas Mukhopadhyay
Subhas.Mukhopadhyay@mq.edu.au

IEEE IMS NSW Chapter

IEEE IMS NSW Chapter would like to invite you to the opening of the Chapter on 20th July with the following details.

Details of the schedule for the evening:

Date: July 20, 2017

Venue: Building E6B 149, Macquarie University, North Ryde

Time: 6.0pm for 6:30pm start

6:30pm to 7:00pm : Executive committee, IEEE IMS Briefing

7:00pm : DL talk by Prof. Andrew Taberner, IEEE IMS Distinguished Lecturer

Title of the talk: [Measurement and Instrumentation at the Tissue: Machine interface](#)

Abstract: Biomedical Instrumentation is designed to provide clinicians, scientists and consumers with useful information about the performance and properties of the human body in health and disease. In many applications in medicine and biology, scientific instruments and medical devices operate at the interface between the “soft” world of living organisms and biological substances and the “hard” world of measurement and actuation systems. The development of such instruments and devices requires the designer to draw from and master a wide range of techniques and tools that span biology, chemistry, materials science, optics, mechanics, mathematics, electronics, and computing.....etc.....

<http://ieee-ims.org/education/distinguished-lecturers-program>

All welcome
Light snacks and refreshments will be served

Contact: Prof. Subhas Mukhopadhyay, Subhas.Mukhopadhyay@mq.edu.au, Mob: 0421474818

CIGRE CIDER 2017 – Technically Co-sponsored by IEEE Power & Energy Society (PES)

The 2nd edition of the Conference on the Integration of Distributed Energy Resources (CIDER) for the Asia Pacific region will be held in Rydges World Square, Sydney, in the 15 and 16 August 2017. CIDER is organised by the CIGRE Australia C6 Panel, Distribution Systems and Dispersed Generation, and technically co-sponsored by the IEEE Power and Energy Society (PES). Further information can be found at

[:http://cigreaustralia.org.au/cigre-events/cider-2017/](http://cigreaustralia.org.au/cigre-events/cider-2017/)

IEEE PES T&D 2018

The IEEE PES T&D Conference and Exposition will take place in Denver Colorado from the 16th to the 19th of April 2018. The Conference and Exhibition attracts leading companies and individuals from around the world to take part as both exhibitors and attendees. Further Information can be found at:

www.ieeet-d.org/IEEE18/public/enter.aspx

University of Wollongong PES Student Chapter Lecture

The PES Student Chapter at the University of Wollongong hosted a technical seminar on “Lightning Phenomena, Effects and Protection” from distinguished speaker: Prof. Rohan Lucas, Emeritus Professor of Electrical Engineering of the University of Moratuwa, Sri Lanka. The event was well attended by students and staff members of UoW. More photos of the event can be found at:

https://www.facebook.com/pg/IEEE-PES-UOW-Student-Chapter-154209421457060/photos/?tab=album&album_id=652526454958685

Dr. Bruce Poon – e-mail adsphere@optusnet.com.au – extracted this data from the IEEE's SAMIEEE data-base, which isn't easy. Converting what comes out into alphabetically ordered lists of names grouped by grades is now a lot easier than it was, thanks to Bruce.
