

IEEE IMS NSW Chapter, Sydney
2nd Annual Workshop on

Sensors, Instrumentation and Measurements: Theory and Applications

Date: July 18, 2018

Venue: E6B 149, Macquarie University, Sydney, Australia

Purpose: The IEEE Instrumentation and Measurement Society New South Wales Chapter would like to invite researchers, scientists, engineers and practitioners to discuss and present their latest research findings, ideas, developments and applications in the area of Sensors, Instrumentation and Measurement Technologies and their applications in all areas of everyday life.

Objective: The objective of the workshop is to bring together industry and academia to learn about the work of fellow colleagues, share ideas and vision about the present challenges and opportunities in a number of industry sectors and identify common areas for collaboration.

Sensors, measurements and instrumentation are core to everyday life ranging from healthcare, to transport, energy, manufacturing and food. The fields of sensors, measurements and instrumentation are strongly cross-disciplinary and provide opportunities to scientists and engineers from different discipline backgrounds to contribute up-to-date knowledge of applications, technology and solutions to improve the quality of life. There is a need for interactions among researchers, scientists, engineers and practitioners to discuss their research findings and activities.

In the regular sessions there will be an opportunity for participants to present their research works. During the workshop there will be many opportunities for networking.

Schedule: A tentative schedule is as follows:

9:30 – 10:00 Tea
10:00 – 10:15 Opening remarks
10:15 – 12:00 pm – Session 1
12:00pm to 1:00pm – Lunch (Committee meeting)
1:00pm to 2:30 pm – Session 2
2:30pm to 3:00pm – Tea
3:00 pm to 4:30pm – Session 3
4:30 – 4:45 – Closing remarks and Evening Tea.

Registration: Free
