# Joint Institution Lecture Series

## Drones – Evolution of Unmanned Systems Design

*Incorporate them into your business and then what?*

Hosted by: IEEE

This presentation will initially discuss the evolution of Unmanned System design and manufacturing and the considerations for incorporating the use of drones into a business, including the regulatory aspects.

The presenter will then look at the present status and the future of unmanned aerial system platforms.

**Speaker: Jack Cullen**

Jack Cullen is the CEO and Co-Founder of JAR Aerospace, one of the Founders Program's brightest success stories.

JAR specialises in the design and manufacture of Unmanned Aerial System platforms with a wide array of applications.

### VENUE

Harricks Auditorium  
Engineers Australia  
8 Thomas street  
Chatswood

### DATE & TIME

25th July 2019  
17:30 for 18:00 start
